

# Managing Domains with Travel Planners International

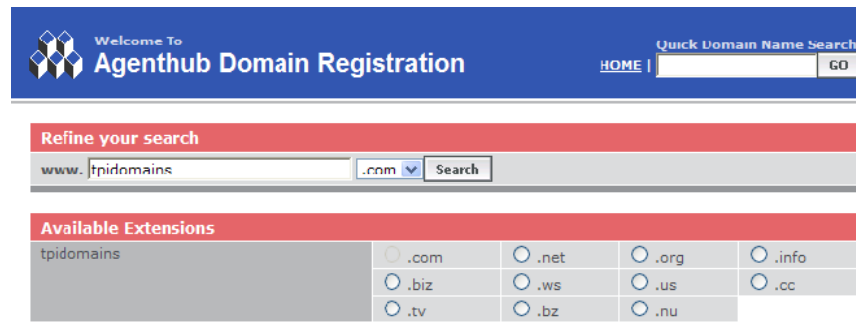

Travel Planners has created a simplified method for you, our valued agent, to purchase a domain name of your choice and redirect it to your free AgentHub Consumer Website.

-Go to: [www.agenthub.net](http://www.agenthub.net) and type in the domain name you wish to purchase:

- Click Register to begin the process.

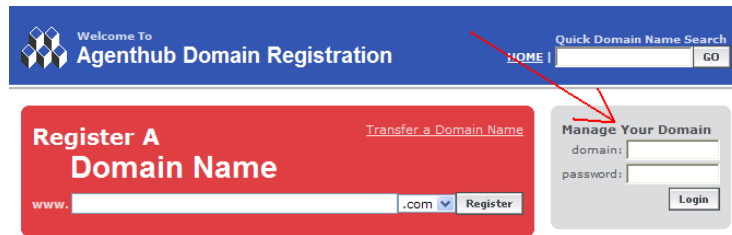

- The results window will open and displaying the domains available closest to the one you searched for, you can choose any extension from the results (.com, .net, .org, etc). If they are grayed out (such as the one below for .com) that signifies the domain has been purchased by someone else and is not available.

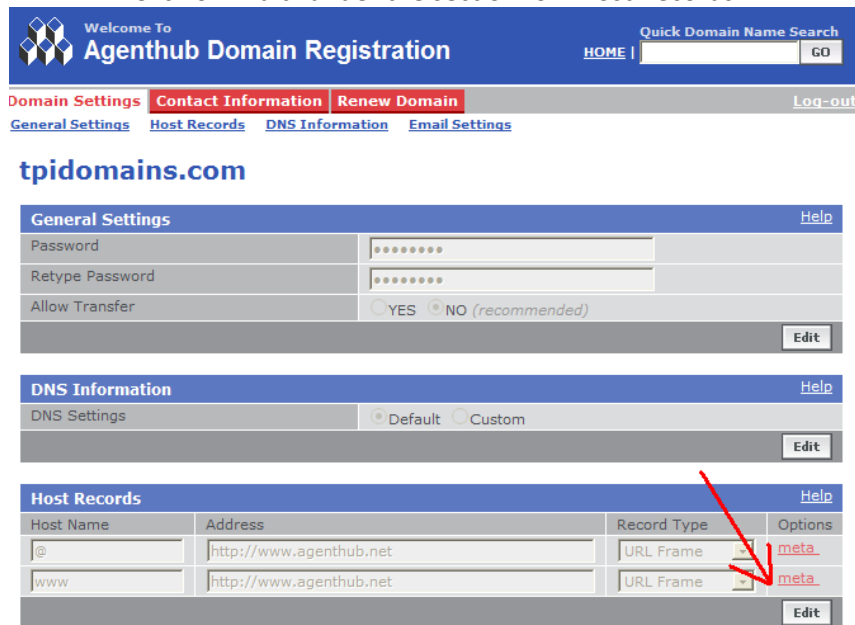

- After you select the domain of your choice, proceed through the next couple steps to purchase your domain, it will request your credit card and personal information. Once processed and accepted, an email will be sent to you with the confirmation of the purchase.

- Now you are ready to log in to manage your new domain. To do so click on "Home" on the registration page you are on, if you closed the window, you can go to this URL:  
<http://www.tpidomains.com>

- Type in your full domain name you just purchased including the "www" and the extension at the end (.com, .net, etc), and the password you chose during the purchase.

- Being logged in, you should be at the page below (located by clicking on "Domain Settings").
- Click on "Edit" under the section for "Host Records"

- There are 2 fields you want to update for the redirect, they are the entries shown above in the same section "Host Records". Change the "Address" on each entry to the URL you wish to redirect your new domain to.

NOTE: to redirect to your free Consumer Website on AgentHub.net, you must type in the URL exactly like this (leave off the "www"):

http://example.agenthub.net (and replace the word "example" with your actual sub-domain on AgentHub.net)

NOTE: it must be a true URL, as shown above including the http://

- Click on Save at the bottom to save your changes.

Changes may take up to 2 hours to take effect, however are normally instantaneous. To test the changes, type in the URL of the domain you purchased, and it should go to the webpage you specified in your settings above.
